

Grade: CX

Description: A general purpose metal effect/diffraction foil suitable for the graphics sector.

Main characteristics: Very bright silver patterns, without the holographic effect, which can be foiled onto a wide variety of substrates including coated/uncoated paper & board as well as OPP & PET film laminates.

Fields of application: Giftwrap, greeting cards, concert tickets, cartons, magazines.

Definition: Medium

Stamping method: Vertical, Platen, Cylinder & Rotary

Working temperature:

Vertical	100 – 130 °C
Platen	100 – 130 °C
Cylinder	130 – 160 °C
Rotary	150 – 210 °C

This should just be used as guidance due to the fact that the temperature is directly related to speed of machinery.

Manufactured widths: 630mm

Please note that this information should be used as a guide only and not as a guarantee of suitability due to the wide variety of substrates and working methods used. We would recommend that a foil sample is tested prior to purchase. We endeavour to keep our foils in stock however please be advised that stock levels do fluctuate depending on demand and we therefore recommend that you contact the office for up to date stock information prior to ordering.
