

Grade:	MTA
Description:	A general purpose metallic foil for the graphics sector.
Main characteristics:	A very versatile foil for various papers/boards such as treated, laminated varnished, UV & water based ink. Very good adhesion properties on a variety of substrates to enable a mix of fine & medium area foiling. Especially good on high speed vertical & rotary presses.
Fields of application:	Packaging & labels for cosmetics, wines, & spirits.
Definition:	Fine to Medium
Stamping method:	Vertical, Platen, Cylinder & Rotary
Working temperature:	Vertical 90 – 120 °C Platen 90 – 120 °C Cylinder 140 – 180 °C Rotary 150 – 210 °C

This should just be used as guidance due to the fact that the temperature is directly related to speed of machinery.

Manufactured widths: 640mm & 1280mm

Please note that this information should be used as a guide only and not as a guarantee of suitability due to the wide variety of substrates and working methods used. We would recommend that a foil sample is tested prior to purchase. We endeavour to keep our foils in stock however please be advised that stock levels do fluctuate depending on demand and we therefore recommend that you contact the office for up to date stock information prior to ordering.
