

Grade:	NHE
Description:	A high gloss transparent foil with a slight tint for the graphics sector.
Main characteristics:	Used as an alternative to spot UV & gloss clear foils especially when a definition is needed between the substrate and the foil. The slight tint adds definition to create "clarity" of the image.
Fields of application:	Label & cartons for the cosmetics, wine, spirits & confectionery market as well as greetings cards & giftwrap.
Definition:	Fine to Medium.
Stamping method:	Vertical, Platen, Cylinder & Rotary
Working temperature:	Vertical 100 – 130 °C Platen 100 – 130 °C Cylinder 130 – 160 °C Rotary 150 – 210 °C

This should just be used as guidance due to the fact that the temperature is directly related to speed of machinery.

Manufactured widths: 610mm

Please note that this information should be used as a guide only and not as a guarantee of suitability due to the wide variety of substrates and working methods used. We would recommend that a foil sample is tested prior to purchase. We endeavour to keep our foils in stock however please be advised that stock levels do fluctuate depending on demand and we therefore recommend that you contact the office for up to date stock information prior to ordering.
